Zhuojun Jiang

zjian115@asu.edu
699 S Mill Ave, Tempe, AZ 85281

Education

Arizona State University — Tempe, USA
Ph.D. Student in Computer Science — 2024 - 2029 *(expected)*
- Research area: Visualization, Accessibility, Visual Perception
- Advisor: Dr. Chris Bryan

Tokyo Metropolitan University — Tokyo, Japan
Master of Computer Science — 2024
- Advisor: Prof. Takao Fukui

The Hong Kong University of Science and Technology — Hong Kong, China
Master of Science in Mechanical Engineering — 2022

Chongqing University — Chongqing, China
Bachelor of Engineering in Industrial Engineering — 2019

4. Yuki Ueno, **Zhuojun Jiang**, Bretho Danzy, Michael Kintscher, Nianwen Dan, Utkarsh Singh, and Chris Bryan. The Story of Wagyu: Bringing Charm of Japan's Pride to the World. *IEEE Pacific Visualization Conference Visual Storytelling Contest*, 2025. **[Oral Presentation, 🏆Honorable Mention]**
5. **Zhuojun Jiang**, Suguru Yorioka, Chika Yajima, and Takao Fukui. Face recognition in self-other discrimination task: Effects of familiarity and mask wearing. *Proceedings of the Japanese Society for Cognitive Psychology*, 2023. **[Oral Presentation]**

Work Experience

Graduate Research Assistant | Sonoran Visualization Lab, USA — 2024.08 - Present
- Research on topics including visualization, data storytelling, visual cognition and perception as a member of the SVL @ASU.

Teaching Assistant | ASU, USA — 2025.01 - 2025.12
- Graduate Course: CSE 578 - Data Visualization
- Assisted with course instruction, including grading assignments, managing student inquiries, and supporting in-class activities.

Teaching Assistant | TMU, Japan — 2022.06 - 2022.09
- Undergraduate Course: Human Informatics - Applied Programming Experiment
- Assisted in preparing course materials including handouts and experimental tools, and supported students through tutoring and inquiry response.

Research Assistant | Fukui Perception & Action Lab, Japan — 2020.04 - 2021.03
- Research on topics including perceptual psychology and cognitive science as a member of the Fukui Lab @TMU.
- Designed experiments and collected data from elderly participants in Japan to explore their cognitive and emotional responses to fraud-related information for a study *The Cognitive and Emotional Characteristics of the Elderly in Identifying Fraudulent Information*.

Academic Services

Reviewer for: *IEEE Visualization Conference (VIS)*

Student Volunteer for: *Japanese Society for Cognitive Psychology Conference (JSCP)*

Research Experience

Face Recognition in Self-other Discrimination Task: Effects of Familiarity and Aging

Master's Thesis at TMU, advised by Prof. Takao Fukui 2022.06 - 2024.02

- Area: Face recognition / Eye Tracking / Perception
- Prepare reports and presentations summarizing research findings.

Swimming Digital Modeling

Master's Graduation Project at HKUST, advised by Prof. Xin Zhang 2021.10 - 2022.04

- Area: 3D Modeling / Computer Graphics / Sports Science
- Modeling in Maya, with a focus on triathlon swimming postures, progresses from a basic digital model with a skeleton system to an optimized kinematic model with a muscle system and an arm display.

Mining and Analysis of Relationship Types between Cloud Services Based on Complex Networks

Undergraduate Thesis at CQU, advised by Prof. Peihan Wen 2018.05 - 2019.06

- Area: Cloud Service Relationship / Manufacturing
- Narrowed service retrieval scope using a service relationship network and established an efficient cloud service relationship super-network model for search and resource tasks.

Factor Analysis of Time-Series Data Using Blind Source Separation Techniques for Audio Signals

Course Project at TMU, advised by Prof. Nobutaka Ono 2022.10 - 2023.02

- Area: Time Series Analysis
- Applied Independent Vector Analysis (IVA) to non-audio time-series data and extracted independent components from the time-series data, enabling effective separation and extraction of relevant information.

Differentiating Authentic Chinese Cuisine from Japanese-Style Chinese Cuisine Based on Reviews

Course Project at TMU, advised by Prof. Mamoru Komachi 2022.06 - 2022.08

- Area: User Behavior Analysis / Human-Centered Computing
- Processed and extracted features text data from Japan's biggest restaurant review sites, constructed and optimized a classification model using the extracted features, training it using the extracted data.

Ark Angel - Prototype for Infant Safety Monitoring System

Course Project at CQU, advised by Prof. Jia Zhou 2018.05 - 2018.07

- Area: HCI / Product Design
- Designed a safety monitoring product for infants and young children, including reality sampling, Storyboard creation for product application scenarios, and product prototype design.

Awards and Honors

- **SCAI Conference Award**, Arizona State University 2025
- **JGC-S Scholarship**, Tokyo Metropolitan University 2022
- **FAST Scholarship**, Chongqing University 2018
- **Merit Scholarship** (awarded twice), Chongqing University 2017, 2018
- **Outstanding Student Award**, Chongqing University 2016

Skills

Technical Skills:

- *Programming Languages*: `Python`, `MATLAB`, `R`
- *Web Technologies*: `JavaScript`, `D3.js`
- *Tools*: `Tobii`, `Maya`

Languages: *English, Chinese, Japanese*
