# Zhuojun Jiang

zjian115@asu.edu
Website Scholar LinkedIn

## Education

**Arizona State University** — Tempe, USA
*Ph.D. Student in Computer Science* — 2024 - 2029 *(expected)*
- **Research interests:** Data Visualization, Visual Perception & Accessibility, Generative AI for Visualization, Human-Computer Interaction
- **Advisor:** Dr. Chris Bryan

**Tokyo Metropolitan University** — Tokyo, Japan
*Master of Computer Science* — 2024
- **Advisor:** Dr. Takao Fukui

**The Hong Kong University of Science and Technology** — Hong Kong, China
*Master of Science in Mechanical Engineering* — 2022

**Chongqing University** — Chongqing, China
*Bachelor of Engineering in Industrial Engineering* — 2019

## Publications

1. **Zhuojun Jiang**, Yuki Ueno, and Chris Bryan. Harnessing LLMs Without Surrendering Control: Delegation Boundaries in Visual Data Storytelling Authoring. *IEEE Visualization Conference*, 2026.
2. Yuki Ueno, Bretho Danzy, **Zhuojun Jiang**, and Chris Bryan. VisCanvas: A Node-based Interface for Exploratory Visualization Authoring with LLM. *IEEE Visualization Conference*, 2026.
3. **Zhuojun Jiang**, Anjana Arunkumar, and Chris Bryan. The Hue-Man Factor: An Empirical Evaluation of Visualization Perception and Accessibility Across Color Vision Profiles. *IEEE Transactions on Visualization and Computer Graphics (TVCG)*, 32(1):703–713, 2026.
4. Yuki Ueno, **Zhuojun Jiang**, Bretho Danzy, Michael Kintscher, Nianwen Dan, Utkarsh Singh, and Chris Bryan. The Story of Wagyu: Bringing Charm of Japan's Pride to the World. *IEEE Pacific Visualization Conference Visual Storytelling Contest*, 2025. [🏆**Honorable Mention**]
5. **Zhuojun Jiang**, Suguru Yorioka, Chika Yajima, and Takao Fukui. Face recognition in self-other discrimination task: Effects of familiarity and mask wearing. *Proceedings of the Japanese Society for Cognitive Psychology*, 2023.

## Research Experience

**GenAI in Visualization Education** — 2025.10 - Present
- Examine GenAI-related changes in students' self-reported competencies and design workflows through paired surveys in a graduate visualization course.
- Collect task completion times, programming artifacts, and interaction data to investigate problem decomposition and human–AI delegation across increasingly complex tasks.

**LLM Delegation in Visual Data Storytelling** | VIS 2026 — 2025.10 - 2026.04
- Investigated how expert authors delegate tasks to LLMs through semi-structured interviews and iterative qualitative coding of risk, verification, and authorial control.
- Identified selective delegation of technical execution, with authors retaining control over narrative, data, and design decisions while shifting effort from production to verification.

**VisCanvas: LLM-assisted Visualization Authoring** | VIS 2026 — 2025.10 - 2026.03
- Contributed to a node-based interface for LLM-assisted visualization authoring, evaluated in a 20-participant study of exploratory workflows, cognitive load, and usability.

## Research Experience (continued)

**EmoMirror: Human-VLM Affective Alignment** 2025.04 - Present

- Built a benchmark of 100 visualizations across four chart types, with affective ratings, demographics, and preferences from 54 participants.
- Evaluated 11 VLMs under five prompting conditions; few-shot personalization gave the most consistent alignment gains, varying by model and participant.

**The Story of Wagyu** | PacificVis 2025 2025.01 - 2025.03

- Co-developed a scroll-driven interactive Wagyu story using D3.js and Scrollama, contributing concept development, animation design, and narrative structure.

**The Hue-Man Factor: Visualization Accessibility** | VIS 2025 2024.08 - 2025.03

- Curated 46 visualizations coded across 26 dimensions; combined controlled evaluations and interviews with participants with color vision deficiency (CVD).
- Identified gaps between CVD simulations and participants' experiences, informing recommendations for redundant encoding, contrast, and clear labeling.

**Face Recognition in Self-other Discrimination** | JSCP 2023 2023.04 - 2024.06

- Examined familiarity and mask-wearing effects using self-friend and self-unfamiliar face morphs across four experimental sessions.
- Estimated judgment thresholds at 15 morphing levels; self-friend morphs tended to yield lower thresholds than self-unfamiliar morphs.

## Work Experience

**Graduate Research Assistant** | Sonoran Visualization Lab, USA 2024.08 - Present

- Research on topics including visualization, data storytelling, visual cognition and perception as a member of the SVL @ASU.

**Teaching Assistant** | ASU, USA 2025.01 - 2025.12

- Graduate Course: CSE 578 - Data Visualization
- Assisted with course instruction, including grading assignments, managing student inquiries, and supporting in-class activities.

**Teaching Assistant** | TMU, Japan 2023.04 - 2023.07

- Undergraduate Course: Human Informatics - Applied Programming Experiment
- Assisted in preparing course materials including handouts and experimental tools, and supported students through tutoring and inquiry response.

**Research Assistant** | Fukui Perception & Action Lab, Japan 2020.04 - 2021.03

- Research on topics including perceptual psychology and cognitive science as a member of the Fukui Lab @TMU.
- Designed experiments and collected data from elderly participants in Japan to explore their cognitive and emotional responses to fraud-related information for a study *The Cognitive and Emotional Characteristics of the Elderly in Identifying Fraudulent Information*.

## Academic Service

**Reviewer for**: *TVCG, VIS, EuroVis, CHI, CSCW, VRST, CogSci*

**Student Volunteer for**: *Japanese Society for Cognitive Psychology Conference (JSCP)*

## Awards and Funding

**IEEE VIS Doctoral Colloquium**, IEEE VIS 2026

**SCAI Conference Award**, Arizona State University 2025, 2026

**JGC-S Scholarship**, Tokyo Metropolitan University 2023

**FAST Scholarship**, Chongqing University 2018

**Merit Scholarship**, Chongqing University 2017, 2018

**Outstanding Student Award**, Chongqing University 2016

## Skills

**Technical Skills**:

- *Programming Languages*: `Python`, `MATLAB`, `R`
- *Web & Visualization*: `HTML`, `CSS`, `JavaScript`, `D3.js`
- *Tools*: `Tobii`, `Maya`

**Languages**: *English, Chinese, Japanese*
